

**Figure 1**

Figure 1 consists of two panels, (a) and (b), showing the evolution of the number of nodes ( $N$ ) over time ( $t$ ). Panel (a) shows the evolution of the number of nodes in the network, which starts at approximately 100 and increases rapidly, reaching a plateau around 1000 after about 100 time steps. The curve is smooth and follows a sigmoidal shape. Panel (b) shows the evolution of the number of nodes in the network, which starts at approximately 100 and increases rapidly, reaching a plateau around 1000 after about 100 time steps. The curve is smooth and follows a sigmoidal shape.
